

ALTUS

SERIES

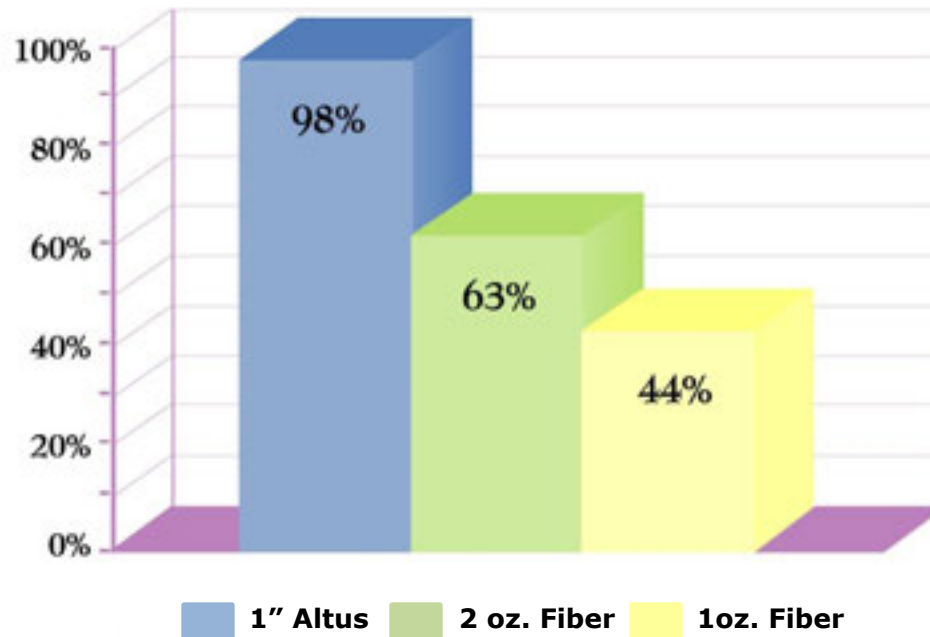

Altus meets the need of the Consumer

- **Body Impressions**
 - Virtually eliminates body impressions increasing customer satisfaction
- **Priced competitively**
 - Increased quilt panel production efficiency
- **Appearance**
 - Maintains height
 - No bunching

Altus Virtually Eliminates Body Impressions

% Height Retention (8,000 cycles roller fatigue against a solid surface)

Height retention measured 1 hour after end of testing.

The story of Altus replaces Polyester fiber

- Superior comfort
- Unsurpassed durability
- Consistent quality
- Better looking mattress
- Increased customer satisfaction

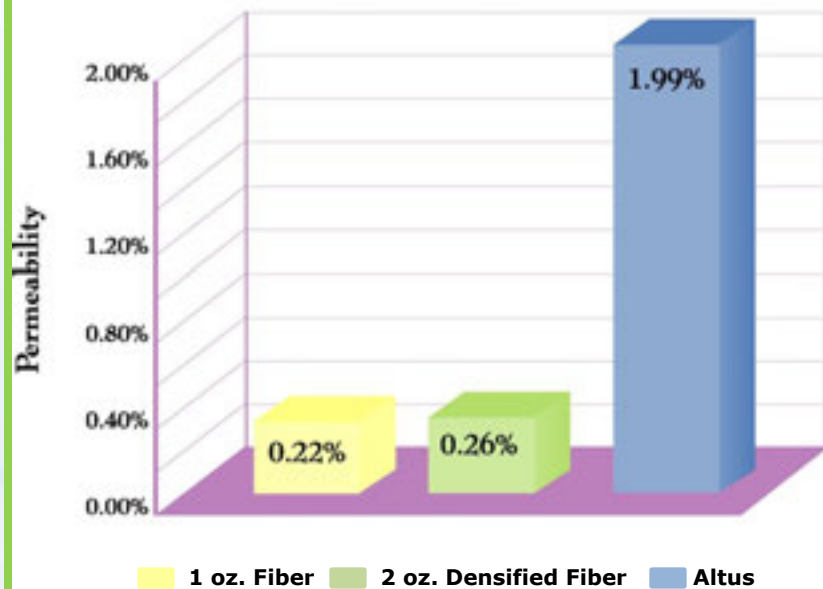

Altus offers distinctive benefits

- Greater breathability
- Better moisture pickup and dissipation
- Closest match to fiber both possible and available
- Material in top layer of the quilt panel provides softness while still maintaining the ability to rebound

Altus dissipates moisture 4 times faster than traditional fiber

Altus Wicks More Moisture

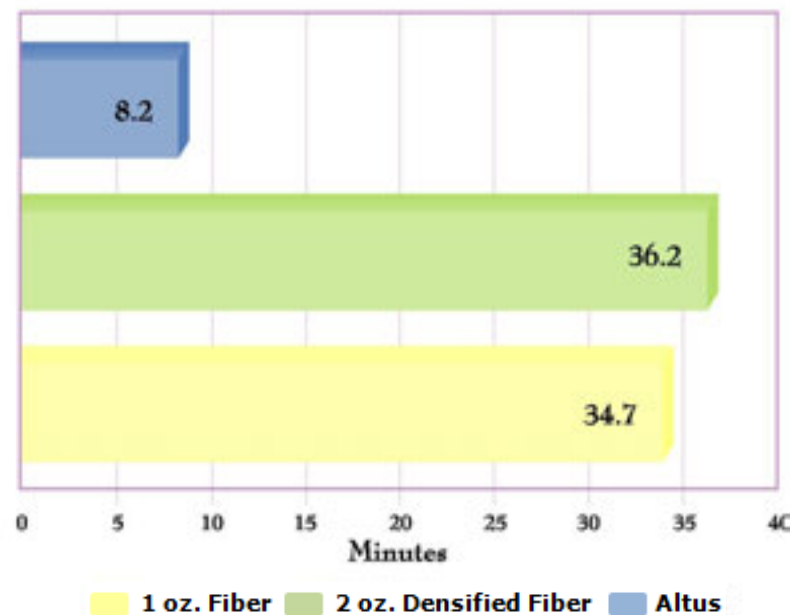

Moisture Pick Up and Dissipation

Samples equilibrated at 95% relative humidity and 125° F for 24 hours.

Altus Dissipates Moisture More Quickly

Time Required for 85% Moisture Dissipation

Samples returned to ambient environment at 50% relative humidity and 70° F.

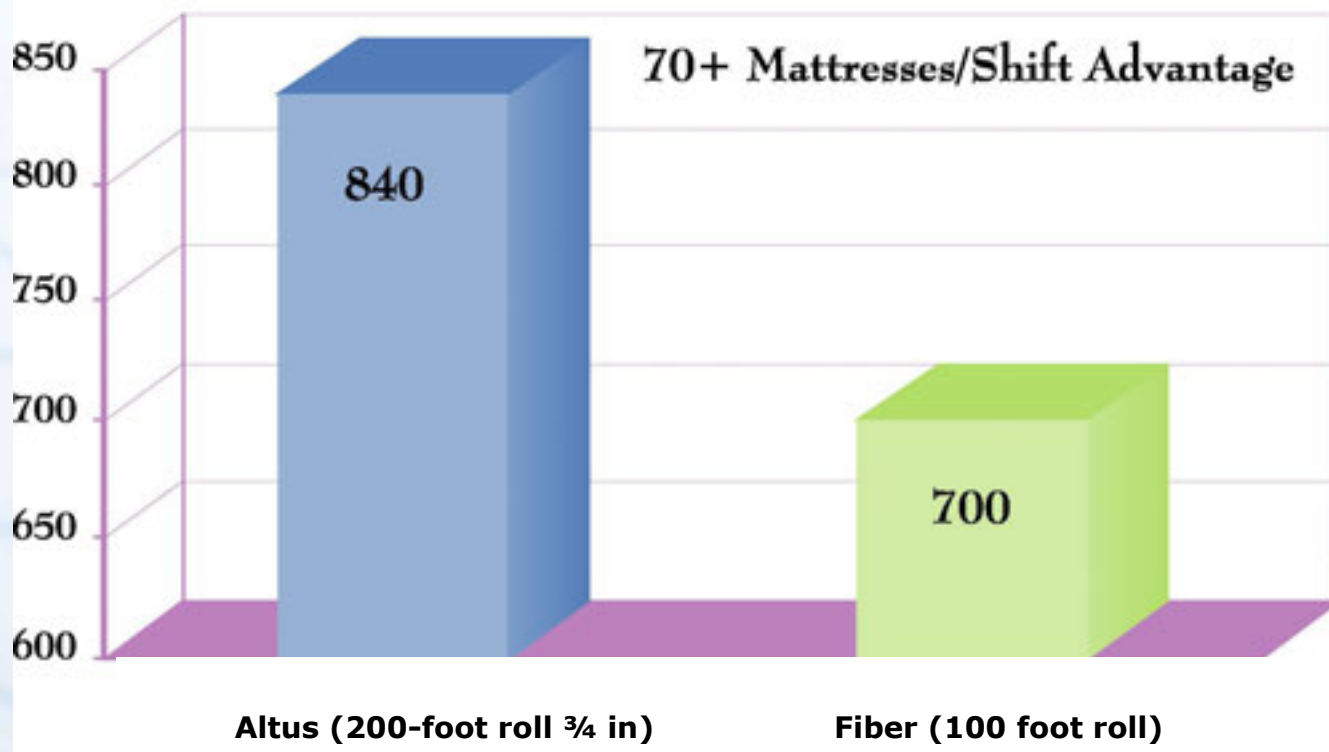

Altus wicks away 9% more moisture than traditional fiber

Altus makes better economic sense.

- Increased production efficiency
- Reduced equipment damage, maintenance and downtime

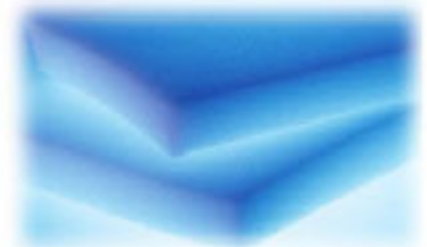

Altus Increases Production

Quilting Panel Production Per 8-hour Shift

Altus delivers where it counts

- Superior Tailoring
- Less wear and tear on machinery
- Superior handling means greater profit margins

Altus is poured at these FXI plant locations
