STEP ONE: CONNECT APPLE TV

1. Connect the Apple TV to a power outlet using the included power cable
2. Connect the Apple TV to an available HDMI input on the television using an HDMI cable
3. Switch the television to the appropriate input (the one you connected the Apple TV to)
4. Using the included Apple TV remote, press any button to wake the Apple TV unit up

Notes
- You must have clear line of sight between the front tip of the Apple TV remote and the front panel of the Apple TV in order to operate
- Each Apple TV remote is factory-paired to the specific Apple TV it is shipped with, so be sure to use only the included Apple TV remote with each unit
- You will know you have selected the correct input when you see an Apple logo or the Apple TV home screen on the television monitor

STEP TWO: CONNECT TO WIRELESS (ONE TIME ONLY)

1. Using the included Apple TV remote, navigate to the Settings icon and select it (center remote button)
2. Navigate to "General" and then "Network"
3. Select the wireless network and enter the password, if required

Notes
- You only need to connect to the wireless network once; it will automatically connect in the future

STEP THREE: START AIRPLAY MIRRORING

1. Ensure the Apple TV is awake (press a button on the remote and confirm you can see the Apple TV home screen on the television)
2. On the iPad, swipe up from the bottom of the screen to reveal Control Center
3. Select AirPlay, select the desired Apple TV to begin mirroring to, and turn Mirroring to On
